Subject: Application for Full Stack Developer Position – Multi-Agent Solutions at EY

Dear Hiring Manager,

I am a Software Engineer with hands-on experience building full-stack web applications and integrating AI-powered solutions. I am excited about the opportunity to contribute to EY's multi-agent platform development.

During my recent work at IT Serv, I designed and developed a full-stack healthcare platform using React for the frontend and Flask (Python) for the backend. I integrated AI functionalities using Hugging Face models, built RESTful APIs connecting the frontend to AI-powered features, and established CI/CD pipelines with Docker and Jenkins. This experience aligns closely with building user-facing interfaces for AI agent interactions and backend services.

My technical background includes:

- React, TypeScript, and Node.js (NestJS) for modern web interfaces
- Python (Flask) and RESTful/GraphQL API development
- Experience integrating AI models with web applications
- CI/CD implementation and secure deployment practices
- Database management (MongoDB, PostgreSQL, MySQL)

At IronByte, I developed a full-stack educational platform with NestJS and React, implementing secure authentication and authorization. At Ooredoo Tunisie, I built an internal communication application with Spring Boot and Angular, delivering UX/UI design and comprehensive testing.

While I have strong cloud fundamentals through my work with Docker, CI/CD pipelines, and deployment automation, I am eager to deepen my expertise in Azure services and would bring a quick learning ability and strong problem-solving skills to master Azure App Services, Functions, and authentication systems.

I am proficient in English and French, with excellent collaboration skills developed through agile team environments. I would be thrilled to contribute to building secure, scalable solutions for EY's internal multi-agent platform.

Thank you for considering my application. I look forward to discussing how my experience can contribute to EY's team.

Best regards,

Yosr Ben Nagra
