Profile (Amiltone-focused)

React developer with experience on web applications using React and TypeScript, real-time collaboration, and CI/CD workflows. Final year project: AI-assisted medical diagnosis web app with a body map UI (select body part + symptoms) and a model-driven prediction workflow.

Skills

- Front-end: React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS.
- Back-end: Flask, NestJS; API integration.
- Data: PostgreSQL (user data), MongoDB (medical data).
- AI/ML: Hugging Face, TensorFlow, Transformers.
- Delivery and quality: Jenkins, SonarQube, unit tests, Prometheus, Grafana, Docker.

Experience

Final Year Internship (PFE) - Itserv, Tunis

02/2025 – 08/2025

Full-stack Developer (PFE Internship)

- Built a body map interface to select a body part and then choose symptoms.
- Integrated an AI workflow to predict likely disease based on symptoms.
- Developed a React + Flask app with a hybrid database setup: PostgreSQL (users) and MongoDB (medical data).
- Set up CI/CD, code quality, and monitoring: Jenkins, SonarQube, unit tests, Prometheus, Grafana.

Internship - Ironbyte

2024

Full-stack Developer (Internship)

- Educational platform (React, NestJS): assignment submission, lesson sharing, and automated timetable creation.
- Automated timetable tool improving scheduling efficiency by 40%.

Internship - Ooredoo

2023

Full-stack Developer (Internship)

- Internal communication suite: real-time chat, filtering/search, and admin tools (Angular + PrimeNG; Spring Boot).
- Contributed to quality with unit and integration tests.

Academic Project

Collaborative Documents App (Notion-like) - ESPRIT | React, NestJS, WebSockets, CI/CD

Education

ESPRIT - Private Higher School of Engineering and Technology

2020 – 2025

Engineering / Computer Science studies

Lycee Soukra

2019

Baccalaureate in Computer Science

Certifications

CS107 (Saylor, 2022) | Honoris (2024) | Hashgraph (Hadera, 2025) | MongoDB RAG (MongoDB, 2025)

Languages

French | English
