Dear Hiring Team,

I would love to join **[COMPANY]** as a **[ROLE]**. I am a full-stack developer specialized in React and TypeScript, equally comfortable in the backend (Node.js, NestJS, Spring Boot), databases (PostgreSQL, MongoDB), and DevOps (Docker, Jenkins, CI/CD).

Most recently I built a full-stack AI medical diagnosis app (React + Flask, hybrid PostgreSQL/MongoDB, AI models, full CI/CD) during my engineering internship at Itserv, and earlier shipped real production features at Ooredoo with Spring Boot and Angular. I care about clean, tested, maintainable code and I learn fast.

You can see my work at portfolio-yosr.vercel.app. I would be glad to talk about how I can help **[COMPANY]**. Thank you for your time.

Best regards,

Yosr Ben Nagra
