

YOSR BEN NAGRA

Full Stack Developer (Node.js/React)

yosrbennagra@gmail.com | +216 53916040 | Tunis, Tunisia | portfolio-yosr.vercel.app | github.com/YosrBennagra | linkedin.com/in/yosr-ben-nagra

Professional Summary

Full stack developer building end-to-end web applications with **Node.js and React**. Strong foundations in **REST/GraphQL** APIs, real-time features, authentication, and **CI/CD**. Ambitious and always improving: I aim high, push my limits, and focus on adding measurable value to the development lifecycle.

Education

ESPRIT, Computer Science Engineering, 2020–2025, Tunis

Lycee Soukra, CS Baccalaureate, 2019

Technical Skills

React: Hooks, Context API, React Router, Redux Toolkit, React Query, Next.js

Node.js: Express.js, NestJS, REST APIs, GraphQL, WebSockets (Socket.io)

Data: MongoDB, PostgreSQL, Redis; Prisma/Mongoose

Auth & Testing: JWT, RBAC; Jest, React Testing Library, Cypress

AI/LLM: Python, Hugging Face Transformers, fine-tuning, RAG pipelines

DevOps: Docker, Kubernetes (basics), Helm; Bitbucket, GitHub Actions, Harness

Soft Skills: Agile/Scrum, Team Collaboration, Problem-Solving, Communication, Adaptability, Critical Thinking, Time Management, Autonomous

Professional Experience

Full Stack Developer (PFE) – AI Medical Diagnosis Platform

Itserv, Tunis

02/2025 – 08/2025

- Developed full stack application with **React/TypeScript** frontend and **Flask** REST API backend, with hybrid **PostgreSQL + MongoDB** database system
- Implemented **JWT** authentication, **RBAC** access control, and integrated AI models through REST endpoints
- Built a **RAG pipeline** and fine-tuned a Transformer-based model on medical data to predict likely diseases
- Deployed **CI/CD** with Jenkins/Docker; quality and monitoring via SonarQube and Prometheus/Grafana

Full Stack Developer – Collaborative Documents Platform

ESPRIT, Tunis (Academic Project)

2024

- Built a **Node.js/React** application (NestJS, TypeScript) with REST APIs and real-time collaboration using **Socket.io**
- Implemented **JWT** authentication system with refresh tokens, API middleware for auth, validation, error handling, and logging
- Developed a document editor with permissions and version history

Full Stack Developer – Educational Platform

Ironbyte, Tunis

2024

- Built **Node.js/Express** backend with optimized MongoDB schemas (indexing), RESTful APIs with pagination, filtering, and search
- Implemented WebSocket real-time updates, **+40% efficiency** improvement, complete Dockerization, CI/CD pipeline

Personal Projects

Overlayos – Custom operations dashboard

Personal

Full-stack (React/Node.js)

- Built a web dashboard to centralize tracking for meetings, platform tools, and user/admin management
- Implemented a Node.js (Express) API with MongoDB/PostgreSQL persistence and role-based access patterns (JWT/RBAC)
- Added real-time updates using Socket.io for activity/status events
- Containerized with Docker; experimented with Kubernetes (basics) and Helm, and CI workflows (Bitbucket/Harness)

Event-driven e-commerce (in progress)

Personal

Full-stack (React/NestJS)

- Building a small e-commerce system using event-driven patterns for orders, payments, and notifications
- Implementing reliability features (retries, idempotency) and an admin view to trace and reprocess failures
- Using Docker; experimenting with Kubernetes (basics) + Helm and a simple CI workflow

Certifications

MongoDB – Building RAG Apps, 2025

Hadera – Hashgraph Developer, 2025

Saylor Academy – C++, 2022

Languages

English – Fluent

French – Professional

Arabic – Native
